RetinaVue Consent Form

About the Procedure

As part of your visit at Encompass Medical Group, your provider recommends a diagnostic procedure called Wellness Retinal Imaging. The procedure captures a digital image of the back part of your eye (the retina). It is not an X-ray or ultrasound, and nothing will touch your eye.

Purpose and Medical Record

This screening helps assess the current health of your eye and safeguard specific eye structures. It does not replace a comprehensive eye examination performed in a specialist's office. The retinal image will become a permanent part of your medical record and may be sent to a specialist upon request.

Insurance and Payment

An additional copayment may apply depending on your individual insurance coverage.

Consent

☐ Yes, I consent to having retinal photographs taken for documentation as part of my medical record.
